## European Technical Assessment

**ETA 13/0605  
of 06/10/2017**

English translation prepared by IETcc. Original version in Spanish language

### General Part

**Technical Assessment Body issuing the ETA designated according to Art. 29 of Regulation (EU) 305/2011:**

Instituto de Ciencias de la Construcción Eduardo Torroja (IETcc)

**Trade name of the construction product**

**Anchor Cloverfix MTP  
Anchor Cloverfix MTP-G  
Anchor Cloverfix MTP-X**

**Product family to which the construction product belongs**

Torque controlled expansion anchor made of galvanized steel or sherardized steel of sizes M8, M10, M12, M16, M20 and M24 for use in concrete.

**Manufacturer**

**Técnicas Expansivas S.L.**

**This European Technical Assessment contains**

14 pages including 3 annexes which form an integral part of this assessment. Annex D contains confidential information and is not included in the European Technical Assessment when that assessment is publicly disseminated

**This European Technical Assessment is issued in accordance with regulation (EU) No 305/2011, on the basis of**

European Technical Assessment EAD 330232-00-0601 "Mechanical Fasteners for use in concrete", ed. October 2016

**This version replaces**

ETA 13/0605 issued on 16/07/2014

*English translation prepared by IETcc*

This European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission according to article 25 (3) of Regulation (EU) No 305/2011.

## SPECIFIC PART

### 1. Technical description of the product

The Cloverfix MTP wedge anchor in the range of M8, M10, M12, M16, M20 and M24 is an anchor made of galvanised steel. The Cloverfix MTP-G wedge anchor in the range of M8, M10, M12, M16 and M20 is an anchor made of sherardized steel. The Cloverfix MTP-X wedge anchor in the range of M8, M10, M12, M16 and M20 is an anchor made of galvanized steel. The anchor is installed into a predrilled cylindrical hole and anchored by torque-controlled expansion. The anchorage is characterised by friction between expansion clip and concrete.

Product and product description is given in annex A.

### 2. Specification of the intended use in accordance with the applicable European Assessment Document.

The performances given in section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a mean to choosing the right products in relation to the expected economically reasonable working life of the works.

### 3. Performance of the product and references to the methods used for its assessment

#### 3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic resistance under static or quasi static loading	See annexes C1 to C3
Displacements under tension and shear loads	See annex C4
Characteristic resistance under seismic loading categories C1 and C2	See annex C5 and C6

#### 3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for class A1
Resistance to fire	See annex C7

#### 3.3 Hygiene, health and the environment (BWR 3)

This requirement is not relevant for the anchors.

#### 3.4 Safety in use (BWR 4)

The essential characteristics regarding safety in use are included under the basic works requirements Mechanical resistance and stability.

English translation prepared by IETcc

### 3.5 Protection against noise (BWR 5)

This requirement is not relevant for the anchors.

### 3.6 Energy economy and heat retention (BWR 6)

This requirement is not relevant for the anchors.

### 3.7 Sustainable use of natural resources (BWR 7)

No performance determined

## 4. Assessment and Verification of Constancy of Performances (hereinafter AVCP) system applied, with reference to its legal base

The applicable European legal act for the system of Assessment and Verification of Constancy of Performances (see annex V to Regulation (EU) No 305/2011) is 96/582/EC.

The system to be applied is 1.

## 5. Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document.

The technical details necessary for the implementation of the AVCP system are laid down in the quality plan deposited at Instituto de ciencias de la construcción Eduardo Torroja.

Cloverfix MTP, MTP-G, MTP-X anchor

Product description

Materials

**Annex A2**

## **Specifications of intended use**

### **Anchorage subjected to:**

- Static or quasi static loads
- Seismic actions:
  - for performance category C1:
    - Cloverfix MTP: M10, M12 and M16
    - Cloverfix MTP-X: M10, M12, M16 and M20
  - for performance category C2:
    - Cloverfix MTP: M12 and M16
    - Cloverfix MTP-X: M12 and M20
- Resistance to fire exposure up to 120 minutes: all versions and sizes

### **Base materials:**

- Reinforced or unreinforced normal weight concrete according to EN 206-1:2008
- Strength classes C20/25 to C50/60 according to EN 206-1:2008
- Cracked or uncracked concrete

### **Use conditions (environmental conditions):**

- Anchorages subjected to dry internal conditions.

### **Design:**

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete.
- Verifiable calculation rules and drawings are prepared taking into account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.).
- Anchorages under static or quasi-static actions are designed for design method A in accordance with:
  - ETAG 001, Annex C, edition August 2010
  - CEN/TS 1992-4-1:2009
  - prEN1992-4
- Anchorages under seismic actions (cracked concrete) are designed in accordance with:
  - EOTA Technical Report TR 045, edition February 2013
  - prEN1992-4
  - Anchorages shall be positioned outside of critical regions (e.g. plastic hinges) of the concrete structure
  - Fastening in stand-off installation or with grout layer are not allowed.
- Anchorages under fire exposure are designed in accordance with:
  - ETAG 001, Annex C, design method A, edition August 2010 and EOTA Technical Report 020, edition May 2004
  - CEN/TS 1992-4-1:2009, annex D.
  - prEN 1992-4
  - It must be ensured that local spalling of the concrete cover does not occur.

### **Installation:**

- Hole drilling by rotary plus hammer mode.
- Anchor installation carried out by appropriately qualified personal and under the supervision of the person responsible for technical matters of the site.
- In case of aborted hole: new drilling at a minimum distance away of twice the depth of aborted hole or smaller distance if the aborted hole is filled with high strength mortar and if under shear or oblique tension load it is not the direction of the load application.

<sup>3)</sup> The listed displacements represent mean values

<sup>4)</sup> A small displacement may be required in the design in the case of displacements sensitive fastening of "rigid" supports. The characteristics resistance associated with such small displacements may be determined by linear interpolation or proportional reduction.
