European Technical Assessment

ETA 24/0065 of 12/04/2024

English translation prepared by IETcc. Original version in Spanish language

General Part

Technical Assessment Body issuing the ETA:

Instituto de Ciencias de la Construcción Eduardo Torroja (IETcc)

Trade name of the construction T-PLASTIC PUMA product:

White thermoplastic with premix glass beads, applied by screed box or extrusion, with drop-on material.

Product family to which construction product belongs

ROAD MARKING PRODUCT

Manufacturer: Tpaint B.V.

Hurksestraat 64

5652 AL Eindhoven, Netherlands

Manufacturing plant(s): New Works Road, Low Moor,

Bradford, BD12 0RU, UK

SPECIFIC PARTS

1. Technical description of the product

T-PLASTIC PUMA is a road marking thermoplastic (as defined in EN 1871) used as a surface coating material for signalisation purposes when it is applied on the road requiring dropped-on materials. The thermoplastic is put on the market with indications on types and proportions of dropped-on materials.

Trademark: T-PLASTIC PUMA

Nature: Hot applied (screed box or extrusion) thermoplastic

Colour: White Producer: Tpaint B.V.

Physical and chemical characteristics: see Table 1.1.

Table 1.1: Characteristics in accordance with EN 1871						
CHARACTERISTICS	DECLARED VALUE					
Luminance factor	≥ 0.8					
Chromaticity co-ordinates	Inside white polygon					
Ageing UV	Δß ≤ 0.05					
Heat stability (Δβ)	Δß ≤ 0.1					
Softening point	≥ 80 °C					

The product must be considered as the basis of a family. It may be used in different combinations (proportions) or installation instructions in order to reach different intended uses. Each of these combinations is identified as a System of the same family.

Identification of the Systems

This ETA concerns:

T-PLASTIC PUMA – System 1 defined by the installation instructions given in Table 1.2 (3.0 mm thickness of surface coating material layer), together with the Certificate of Constancy of Performance of the drop-on materials.

Table 1.2: Installation instructions of the T-PLASTIC PUMA – System 1								
	Identification material and type of application	Dosage(s)						
Surface coating material	9							
Drop-on materials	Trademark: 75 % glass-beads 710-125 (3) Echostar 5 25 % mixture antiskid agg./glass beads 1000-150 Sili 12 [ECHOSTAR 5 TRM SRT – DoP 67] Certificate of Constancy of Performance: 1137-CPR-0471/81	350 g/m²						

NOTE: Other combination(s) than System 1, must be assessed and it (they) may give rise to an addendum to this ETA

ETA 24/0065 - version 1 of 12/04/2024 - page 3 of 7

2. Specification of the intended use in accordance with the applicable EAD.

2.1 T-PLASTIC PUMA - Systems 1

- It is intended to be used for white permanent road markings in trafficked areas without presence of traffic with studded tyres.
- It is designed to give to the resulting road marking satisfactory day and night visibility (on dry conditions) and skid resistance properties at initial and after 4 million roll-overs.
- The substrate on which the RPM has provided satisfactory performances, in accordance with EN 1871, is bituminous asphalt.
- The maximum roughness of the test plate on which the RMP has been assessed for durability performance, in accordance with EN 13197, is 0.9 mm (roughness measured as texture depth in accordance with EN 13036-1).
- It is intended to be used (not applied) at a temperature range from -20 °C to +50 °C for outside uses and from +5 °C to +50 °C for indoor uses. In addition, where relevant, the product has provided satisfactory performance for UV ageing.

2.2 Relevant general conditions for the use of the kits

The provisions made in this European Technical Assessment are based on an assumed working life of 1 year as minimum, according to EAD 230011-00-0106, provided that the conditions lay down for the installation, packaging, transport and storage as well as appropriate use, maintenance and repair are met. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right product in relation to the expected economically reasonable working life of the works.

Installation should be carried out according to the ETA holder's specifications and using the specific application instructions of the product manufactured by the ETA holder or by suppliers recognized by the ETA holder. Installation should be carried out by appropriately qualified staff and under the supervision of the technical responsible of the site.

3. Performance of the product and references to the methods used for its assessment

3.1 Essential characteristics of the product

The identification tests and the assessment for the intended use of this Road Marking Product according to the Basic Work Requirements (BWR) were carried out in compliance with the EAD 230011-00-0106 Road Marking Products.

The characteristics of the components shall correspond to the respective values laid down in Table 2 of this ETA, checked by IETcc.

Methods of verification and of assessing and judging are listed afterwards.

3.1.1 Mechanical resistance and stability (BWR 1)

Not relevant

ETA 24/0065 - version 1 of 12/04/2024 - page 4 of 7

3.1.2 Safety in case of fire (BWR 2)

Not relevant

3.1.3 Hygiene, health and environment (BWR 3)

Not relevant

3.1.4 Safety and accessibility in use: (BWR 4)

For testing durability, the manufacturer may choose either:

- method A: Road trial with an option according to EN 1824 (expressed as rollover number) or
- method B: Wear simulator according to EN 13197 (expressed as traffic number).

For this ETA, the manufacturer has chosen for testing durability the method B "Wear simulator". The option No Performance Assessed for method A "Road Trials" is used.

Table 2: Results for T-PLASTIC PUMA - System 1																		
Basic Works Requirement: Safety in use

N	NPA			White		83.1 °C		Δβ = 0.05										

3.1.5 Protection against noise (BWR 5)

Not relevant.

3.1.6 Energy economy and heat retention (BWR 6)

Not relevant.

ETA 24/0065 - version 1 of 12/04/2024 - page 5 of 7

3.1.7 Sustainable use of natural resources (BWR 7)

Not relevant.

3.2 Methods of verification

The assessment for the intended use was carried out according to the Basic Work Requirements (BWR). The characteristics of the components shall correspond to the respective values laid down in Table 2 of this ETA, checked by IETcc.

3.2.1 Retroreflectivity in dry conditions (R_L)

As coefficient of retroreflected luminance R_L (or retroreflectivity), according to the applicable part of EN 1436.

3.2.2 Retroreflectivity in conditions of wetness (R_L)

No Performance Assessed.

3.2.3 Retroreflectivity in conditions of rain (R_L)

No Performance Assessed.

3.2.4 Chromaticity co-ordinates (x, y)

As chromaticity co-ordinates CIE (x, y), according to the applicable part of EN 1436.

3.2.5 Luminance Factor (β)

According to the applicable part of EN 1436.

3.2.6 Luminance coefficient under diffuse illumination (Qd)

According to the applicable part of EN 1436.

3.2.7 Skid resistance (SRT)

According to the applicable part of EN 1436.

3.2.8 Durability

For this ETA, the manufacturer has chosen for testing durability the method B "Wear simulator" according to the specifications given in EN 13197. Test plates roughness: measured according to EN 13036-1 and the results expressed as the texture depth.

3.2.9 Bleed resistance (only for paints)

Not applicable.

ETA 24/0065 - version 1 of 12/04/2024 - page 6 of 7

3.2.10 Alkali resistance

No Performance Assessed.

3.2.11 Indentation (only for thermoplastics)

No Performance Assessed.

3.2.12 Softening point (only for thermoplastics)

According to the applicable part of EN 1871.

3.2.13 UV ageing

According to the applicable part of EN 1871.

- Assessment and verification of constancy of performance (hereinafter AVCP) system applied, with reference to its legal base
- 4.1 System of assessment and verification of constancy of performance

According to the decision 96/579/EC of the European Commission¹, system 1 of assessment and verification of constancy of performance (see EC delegated regulation (EU) N.º 568/2014 amending Annex V to Regulation (EU) N.º 305/2011) applies.

5. Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD

Technical details necessary for the implementation of the AVCP system are laid down in the control plan which is deposited at IETcc².

For type testing, the results of the tests performed as part of the assessment for the European Technical Assessment shall be used unless there are changes in the production line or plant. In such cases, the necessary type testing has to be agreed between IETcc and the notified body.

Issued in Madrid on 2024 April 12
